TECHNICAL SKILLS

Applied Data Science

Artificial Intelligence

Natural Language Processing

Computer Vision

Large Language Model

Generative AI

Unstructured Data Handling

PROFILE

Passionate and results-driven Data Scientist with an entrepreneurial mindset, seeking to leverage expertise in AI/ML technologies and data analysis to make a significant impact on the development of innovative solutions.

PROJECTS

- Expression Decoder: Machine learning application detecting human bodies and decode expressions.
- Hand Sign Translator: AI using google media pipe, pandas, opencv, sklearn, numpy & csv.
- Sentiment Analyzer: ML application performing sentiment analysis on a provided text.
- Weather Predictor: using Neural Prophet to forecast weather conditions for the next 1200 days (Toronto).

SOFT SKILLS

Effective Communication

Collaborative Teamwork

Adaptable Learning

Efficient Time Management

Meticulous Presentation

EDUCATION

George Brown College

2021 - 2024

Computer Programming &
Analysis

Coursera

2023 - 2024

IBM Data Science Professional
Certificate

IBM Applied AI Professional
Certificate

EXPERIENCE

TEACHER ASSISTANT @ George Brown College

2023 - 2024

- Assisted students with technical issues related to programming tools, development environments, or specific programming languages.
- Supported the instructor during lectures by explaining concepts, assisting with demonstrations, or answering students' questions.

COLLEGE TUTOR @ George Brown College

2023 - 2024

- Conducted regular office hours to provide additional help and clarification to students who may be struggling with the course materials.
- Developed additional learning resources, such as code examples, tutorials, or documentation, to supplement course materials.
